

PRANJAL MITRA

B.Tech CSE (Core) Undergraduate

First-year B.Tech Computer Science & Engineering student at MRIIRS, Faridabad, with a strong interest in software development, web technologies, embedded systems, and problem-solving. Experienced in developing both web-based and hardware-integrated projects, including portfolio websites, IoT systems, and automation solutions. Active core member of the Hack With India college club with experience in volunteering and event management. Seeking internship opportunities to gain practical industry exposure, enhance technical expertise, and contribute to innovative technology-driven projects.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering (Core)
Manav Rachna International Institute of Research and Studies (MRIIRS), Faridabad

2025 – 2029 (Expected)

- Semester 1 SGPA: 6.41/10

Class XII (CBSE)

Siddhartha International Academy, Purbadih, Gola

- Percentage: 65%

Class X (CBSE)

Delhi Public School, Chas, Bokaro

- Percentage: 88%

PROJECTS

Personal Portfolio Website

HTML, CSS, JavaScript, GitHub Pages

- Developed a responsive personal portfolio website showcasing projects, skills, certifications, and professional profiles.
- Implemented a clean user interface with mobile responsiveness and modern design principles.
- Successfully deployed using GitHub Pages.

Arduino-Based Bluetooth RC Car

Arduino, Bluetooth Module, Embedded C

- Designed and developed a Bluetooth-controlled robotic vehicle using Arduino.
- Enabled wireless control through a smartphone interface.
- Integrated motors, drivers, and communication modules for real-time navigation.

github.com/pranjalmitra123-star/Arduino-Bluetooth-RC-Car

Shadow Detection System Using Raspberry Pi Pico

Raspberry Pi Pico, Sensors, Embedded C

- Developed a sensor-based system capable of detecting variations in light intensity.
- Implemented real-time monitoring and response mechanisms.
- Enhanced understanding of IoT and embedded system concepts.

github.com/pranjalmitra123-star/Shadow-Detectooth-System

Hotel Management System (Ongoing)

HTML, CSS, JavaScript, Git, GitHub

- Developing a web-based hotel management platform with modern UI/UX principles.
- Features include reservation management, customer records, and billing modules.
- Designed with responsive architecture for seamless multi-device accessibility.

CERTIFICATIONS

- LinkedIn Learning Certifications
- Google Gemini Workshop / Training Certificate
- TEDxMRU Participation Certificate
- Innoskill Certificate

LEADERSHIP & ACTIVITIES

- Core Member – Hack With India College Club
- Active Volunteer in College Events
- Event Organizer for Technical and Cultural Activities
- Sports Enthusiast – Badminton
- Passionate Learner Exploring Emerging Technologies

EXTRA CURRICULAR INTERESTS

Badminton

TECHNICAL SKILLS

Programming Languages

- C
- Python
- JavaScript

Web Technologies

- HTML5
- CSS3
- JavaScript

Tools & Platforms

- Git
- GitHub
- VS Code

Professional Skills

- Problem Solving
- Communication
- Leadership
- Teamwork

LANGUAGES

- English
- Hindi
- Bengali

TECHNICAL INTERESTS

- Web Development
- Embedded Systems
- Software Engineering
- Artificial Intelligence Tools
- Problem Solving & Automation
